

Dash Camera and Tracker Policy – Customers Vehicles

A policy to
protect our
employees,
customers and
suppliers
individual
rights

Dash Camera and Tracker Policy Customers Vehicles

Why we need this policy?

To protect our employees, customers and suppliers individual rights in relation to video and geospatial recording.

Does it apply to you?

This policy covers all vehicles while on our premises and in our possession.

Our Policy & What you have to do

It is Steer Automotive Group Ltd ('our') policy that all dash cameras and trackers must be turned off or covered up if unable to be disabled.

We take the privacy of our employees, customers and suppliers personal data seriously.

It is against GDPR and our CCTV policy, to allow employees to be recorded without first obtaining their consent and allowing them access to the footage if requested.

As we are not in control of the recordings we do not allow the use of dash cameras and trackers while on our premises or while the vehicle is within our possession.

All dash cameras and trackers must be turned off or covered up if unable to be disabled
